

The hospital is one of the key hospitals in Northern Syria, specializing in orthopaedics. UOSSM installed 300 solar photovoltaic panels and 12 inverters with a capacity of 90 kWp DC power, 216 batteries capable of storing 540 kWh of power, and advanced data control systems.

Specifically for Syrian Arab Republic, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and ...

Locals value the solar panels in Syria despite a high initial investment cost. In interviews with The New York Times, many locals described the panels as "god-sent." After the initial investment, solar panels are a virtually cost-free source of electricity. Thousands of locals now use solar panels to power their lights and electronics.

Locals value the solar panels in Syria despite a high initial investment cost. In interviews with The New York Times, many locals described the panels as "god-sent." After the initial investment, solar panels are a ...

SYRIASOLAR Integral Solar Energy Solutions . In order to provide development and environmental projects, Syria Solar has carried out several different environmental projects for about ten years now, including

480 solar panels capable of producing 127 KW of DC power; 288 batteries capable of storing 720 kWh; 23 advanced inverters; Advanced data and control systems, power electronics and an energy storage system that enables it to run in parallel to diesel generators.

Geographically, Syria is one of the best places in the world to harness solar energy. Through an energy resilience study, UOSSM determined that solar panels, when used with an energy storage system and a diesel generator, are the most effective solution for hospital energy management.

As for energy generation projects, Syria Solar is proud to implement an integrated model between wind energy and solar energy with a capacity of 1 Kw-h for the Scientific Creativity School in Damascus 4. In the field of water heating, it has a distinguished and long history with this field in its industrial and domestic aspects.

Syria solar homepage

Committed to transforming the electricity landscape and increasing the adoption of renewable energy in Syria, the government is aiming to have 10% of electricity generated from solar power by 2030. The Syrian Ministry of Electricity is currently managing the construction of a 100kW solar power plant in the town of Sargaya, which is scheduled to ...
