

Target energy solutions Cabo Verde

We develop, implement, and support end-to-end IT solutions that simplify your infrastructure, eliminate cost and allow you to scale on demand. We take the pressure off you and your IT department so you can focus on what matters most: running your business.

TGS has been selected to assess the feasibility of interconnecting the Cabo Verde islands to optimise renewable energy resources, such as wind, solar and green hydrogen. The energy data and intelligence provider will undertake a pre-feasibility study in collaboration with RTE International and Consultores de Engenharia e Ambiente (COBA).

Source: Cape Verde 50%Renewable - Energy Master Plan 2010-2020 (GESTO Energy 2010) Cape Verde Renewable Energy Masterplan establishes different targets for each island in order to reach the

Target Energy Solutions. 1,745 likes. We are an international technology and services company, focused on enabling digital transformation solutions for data-driven industries.

Cabo Verde is committed to implement the Sustainable Energy for All (SE4all) agenda and - as host to the ECOWAS Regional Centre for Renewable Energy and Energy Efficiency (ECREEE) - intends to assume regional leadership on energy transformation in Africa. Cabo Verde has recently signed together with the

Ocean thermal energy conversion (OTEC) is an emerging technology that could be suitable for Cape Verde. Microgrids and self-generation could prove to be more cost effective than grid...

A cloud-native petrotechnical master data repository focused on fully extensible data management solutions for oil and gas companies who need to manage seismic, well, geospatial and production datasets.

The energy data and intelligence provider will undertake a pre-feasibility study in collaboration with RTE International and Consultores de Engenharia e Ambiente (COBA). The study will analyse the potential for offshore and onshore renewable energy integration; storage solutions; the environmental impact of interconnection; and the long-term ...

The Renewable Energy Atlas includes the strategic identification of resource potential, location and analysis of the solar, wind, pumped-storage, geothermal and wave resources, and resulted in the identification of 2.600 MW of Renewable Energy potential in Cape Verde, from which Gesto studied more than 650 MW in feasible projects that would ...
