

What is a Teknoware central battery system?

Teknoware's range of central battery systems starts with small systems containing just a few dozen luminaires and a single central battery unit up to centrally controlled systems containing thousands of luminaires.

What products does Teknoware manufacture?

Teknoware also manufactures a range of central battery systems. In addition to the standard features, there is also available an automatic addressable testing system. Teknoware's entire product range is designed to meet the requirements of the relevant European directives and standards. This is proved with certificates from accredited laboratories.

What solutions does Teknoware offer?

Both centrally supplied and self-contained solutions are available. We also supply a unique fibre optic Low Location Lighting system based on our own Optiline(TM) fibre. Teknoware also manufactures a range of central battery systems. In addition to the standard features, there is also available an automatic addressable testing system.

How does Teknoware use BACnet?

Teknoware uses BACnet modules as an interface, to transfer BACnet objects from the Central Battery Systems and the luminaires. Battery and luminaire tests can also be initiated. PC software can be used to read the information of the Central Battery Systems through the BACnet bus. Also a separate COBA Software is needed for the PC.

How does Teknoware IC work?

Teknoware's IC (Intelligent Controller) system enables a large amount of different options, to turn the non-maintained emergency lights ON and OFF, by using voltage inputs, which can be freely chosen. At the same time, the voltage of several fuse boxes or general lighting can be monitored.

Who is Teknoware?

Teknoware is well established in the field of lighting technology, with extensive experience of designing and manufacturing safe and reliable emergency lighting. We safely direct people to exits in hotels, hospitals, shopping centres, libraries and numerous other public buildings. For passenger ships we have a purpose-built special product range.

Our products cover central battery units, accessories, and spare parts, as well as complete systems that include everything you need to provide emergency lighting for even the most ...

Our products cover central battery units, accessories, and spare parts, as well as complete systems that include everything you need to provide emergency lighting for even the most challenging sites. We also offer a variety of central monitoring systems and remote management solutions for central battery systems.

The document provides information about the TAPSA CONTROL CENTRAL BATTERY UNIT TKT6608CFP. It can supply medium to high numbers of luminaires through 8 output circuits. It has inputs of 220-240 ...

Explore Teknoware Middle East's Addressable Central Battery Systems, offering intelligent power solutions for emergency lighting. Learn about the advanced features, addressable control, monitoring capabilities, and enhanced efficiency designed for safety and compliance in various applications across the Middle East region.

Explore Teknoware Middle East's Central Battery Systems 6 Series, offering advanced power solutions for emergency lighting. Learn about the cutting-edge features, centralized control, ...

Central Battery Systems in the TKT67 series offer effective solutions for supplying a large quantity of luminaires. They are especially suited for large premises. The central unit input voltage is ...

Teknoware offers a 230V AC/DC-based Central Battery System (CBS) consisting of control panels, aesthetically appealing emergency and exit luminaires, sub-circuit monitoring modules, address modules to connect third-party luminaires ...

The central battery system in the TKT78C series is particularly suitable for medium-sized buildings. You can choose from models ranging from 4 to 24 output circuits. The maximum ...
