

In the heart of the Bas-Mono region in southern Togo, a quiet revolution is taking place, powered by the sun. Thanks to an innovative solar irrigation scheme financed by the African Development Bank and the European Union, farmers like Hounlessondji Kpadonou and Dansou Kodjovi Zounbléo are witnessing a transformation in their agricultural ...

It has impacted livelihoods in around 500 rural areas in Togo by improving energy access to households, community amenities and small farms. By mid-September 2023, the project had installed 122 solar water heaters in ...

Solar irrigation pumps improve crop yields for farmers in Togo. This large-scale solar power plant built on an area of 92 hectares is equipped with 127,344 solar panels for an energy capacity of 50MW. Annual production is estimated at 90,255 MWH.

The Adétikopé solar power plant will become the largest solar photovoltaic power generation facility in Togo, and even in the West African sub-region. This sustainable development project is now being put out to tender, with two ...

Togo: Agri-photovoltaics in agropolitan regions atmosfair would like to invite all the attendees of the LSC meeting as well as stakeholders who could not attend the meeting to give comments on following relevant project documents:

The current pipeline of grid-connected Agri-PV plants in Togo includes the construction and operation of several solar plants with a total capacity of 10 MWp. SUNtec-Togo Sarl ("Project Company"), in partnership with APRODAT (Agency for the Promotion and Development of Agropoles), has built solar plants as part of the Togolese National ...

A solar irrigation programme aimed at improving the lives of farming communities in Togo has started to yield results. The African Development Bank (AfDB) and the European Union jointly funded the Project to Support the Social Component of Togo's Rural Electrification Programme with \$11.68 million.

In the heart of the Bas-Mono region in southern Togo, a quiet revolution is taking place, powered by the sun. Thanks to an innovative solar ...

It has impacted livelihoods in around 500 rural areas in Togo by improving energy access to households, community amenities and small farms. By mid-September 2023, the project had installed 122 solar water heaters in health centres and provided electricity to 87 peripheral care units.

Togo agro solar

The first planned industrial zone of Togo will pave the way for establishing a truly world-class business and industrial centre. Overall objective of the project is to promote inclusive agricultural growth that creates jobs and reduce food imports, thanks to the incentive measures for private investment in key areas.

The Adétikopé solar power plant will become the largest solar photovoltaic power generation facility in Togo, and even in the West African sub-region. Arise IIP's announcement comes a few weeks after the commissioning of the 50 MWp solar power plant in Blitta, which marks a symbolic step in Togo's development process.

The Adétikopé solar power plant will become the largest solar photovoltaic power generation facility in Togo, and even in the West African sub-region. This sustainable development project is now being put out to tender, with two bidding options.
