

Trinidad and Tobago solar energy central

Today, the Government of Trinidad and Tobago has officially given the green light to project partners, bp, Shell and Lightsource bp to begin construction of the largest solar project in the Caribbean.

A consortium involving oil groups BP Plc (LON:BP) and Shell plc (LON:SHEL) has made a final investment decision (FID) on a 112-MW AC/148-MWp solar project in Trinidad and Tobago after reaching an agreement with the government of the Caribbean island country.

The projects will produce over 300,000 MWh of renewable electricity a year - enough to power up to 42,500 homes and helping to reduce carbon emissions. The plants are being constructed by Lightsource bp, a global leader in the development and management of solar projects. Both sites are expected to be operational in 2024.

The Solar Energy in Trinidad and Tobago Market provides a comprehensive market overview, focusing on the installed capacity of solar power, recent trends, and developments. The industry analysis reveals significant insights into market growth and market trends.

Trinidad and Tobago's transition to renewable energy was given a boost today with the announcement of the 12 finalist sites chosen to receive installations of small-scale roof-mounted Solar Photovoltaic (PV) solar panels, capable of supplying energy for power generation.

The solar project is being constructed by a consortium made up of bp Alternative Energy Trinidad and Tobago (bpATT) and Shell Renewables Caribbean (Shell). Lightsource bp is the construction manager for the project. The project is expected to produce approximately 300,000MWh of green electricity per year.

Database; IRENA Global Atlas; and World Bank Global Solar Atlas and Global Wind Atlas. Additional notes: Capacity per capita and public investments SDGs only apply to developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all

The Solar PV Project is set to be the first utility scale renewable power generation facility within Trinidad and Tobago, set to deliver 112.2MW onto the grid. The arrival to this point is a testimony of the Government's steadfast commitment to decarbonizing the power sector and represents an energy milestone as we create a new energy mix to ...

Trinidad and Tobago's first utility-scale solar project saw a ground-breaking ceremony earlier this week, attended by Trinidadian Prime Minister Keith Rowley

Steady growth in solar Where does Trinidad & Tobago stand in terms of solar energy compared to other
