What are the solar photovoltaic systems in Trinidad and Tobago?

In Trinidad and Tobago and the wider Caribbean there is an abundance of natural energy from the sun. In Trinidad and Tobago a typical day can be insolated for 5-6 hours of sunlight. This makes the Solar photovoltaic (PV) systems very applicable for Trinidad and Tobago. The cost for these systems are constantly coming down.

Who is building the largest solar project in Trinidad and Tobago?

Today, the Government of Trinidad and Tobago has officially given the green light to project partners, bp, Shell and Lightsource bpt to begin construction of the largest solar project in the Caribbean.

Is Trinidad ready for more solar power?

Every person involved in the process has certified solar installation training. Didn't know that was a thing in Trinidad, right? We're definitely ready for more solar power to make a better, more eco-friendly and sustainable world for us all. We understand that solar power is a bit more expensive than other power systems.

How much solar power will the Caribbean have?

The two sites will have a combined capacity to generate a total of 112.2 MW of solar electricity, more than the total generating capacity of most islands in the Eastern Caribbean. This will be the largest solar project in the Caribbean when complete.

Is Trinidad and Tobago achieving net-zero?

Minister of Planning and Development, the Honourable Camille Robinson-Regis, stated: "The Government of Trinidad and Tobago is committed to implementing its obligations and commitments under the Paris Agreement, which includes achieving net-zero in the second half of this century as a national priority.
