

Is Tunisia a good place to invest in solar energy?

Tunisia's climate presents a key solar energy opportunity and, together with an improved investment framework and a highly skilled workforce, the country should be well positioned to support its ambitious Plan Solaire Tunisien. However, to date, Tunisia has fallen short of its intermediate solar PV targets.

Does Tunisia support solar?

Tunisia is supporting utility-scale solar through a series of tenders, the latest of which was launched in January 2023. It also finalized a 500 MW solar tender in December 2019. The country's cumulative installed PV capacity stood at just 506 MW by the end of 2023, according to the International Renewable Energy Agency (IRENA).

Can Tunisia build a large-scale solar project?

Tunisia's Ministry of Industry, Mines and Energy has kicked off a new procurement exercise for large-scale solar. Tunisia's Ministry of Industry, Mines and Energy has launched a tender for the construction of several large-scale PV projects with a combined capacity of 200 MW.

When do solar projects start in Tunisia?

Interested developers have until Jan. 15 to submit their project proposals. Tunisia is supporting utility-scale solar through a series of tenders, the latest of which was launched in January 2023. It also finalized a 500 MW solar tender in December 2019.

What is the energy sector in Tunisia?

The energy sector in Tunisia includes all production, processing and transit of energy consumption in this country. The production involves the upstream sector that includes general oil and gas, the downstream sector that includes the only refinery in Tunisia and most of the production of natural gas, and varied electrical/renewable energies.

What is the Tunisian Solar Plan?

The Tunisian Solar Plan aims at developing an additional renewable energy installed capacity of 3815 MW by 2030. The targeted share per technology is detailed in the chart on the right.

This partnership, supported by Proparco, the Clean Technology Fund, and the Global Environment Facility, highlights our commitment to advancing Tunisia's renewable energy sector." Françoise Lombard, CEO at Proparco, stated, "We are delighted to strengthen our relationship with Scatec and Toyota Tsusho Group.

The latest work of SolarPower Europe's Global Markets workstream puts forward policy recommendations to harness Tunisia's enormous photovoltaic potential and encourage international investment in Tunisia.

The latest work of SolarPower Europe's Global Markets workstream puts forward policy recommendations to harness Tunisia's enormous photovoltaic potential and ...

Tunisia, a North African nation rich in history and culture, is now at a pivotal crossroads in its quest for sustainable energy solutions. The nation's abundant sunlight and a strong commitment to reducing carbon emissions have firmly established solar energy as a linchpin of Tunisia's ongoing energy transition.

With this report we are proud to present our findings on solar investment opportunities in Tunisia. The report provides a snapshot of Tunisia's business environment, major macroeconomic ...

Aeolus remains committed to contributing to the development of Tunisia and other African countries through renewable energy projects," says Aeolus CEO Hideharu Toba. "We are proud to partner with Scatec and Aeolus - Toyota Tsusho Group on their first utility-scale solar projects in Tunisia.

Tunisia's climate presents a key solar energy opportunity and, together with an improved investment framework and a highly skilled workforce, the country should be well positioned ...

Scatec ASA and Aeolus SA, part of the Japanese conglomerate Toyota Tsusho Group, have signed a partnership agreement to jointly develop and own renewable energy projects in Tunisia. Financial close has been achieved for the 120 MW Sidi Bouzid and Tozeur solar projects (each 60 MW), which are part of this agreement.

Global Photovoltaic Power Potential by Country. Specifically for Tunisia, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.
