We were founded in 1994 with a vision to help our clients achieve their energy efficiency, resiliency, infrastructure, and sustainability goals. From the start, we set ourselves apart in our approach as a partner and advocate for our clients. We've grown substantially since then in terms of capabilities, projects, and people.

The solar sites are located in the three US Virgin Islands -- St Thomas, St Croix and St John. Honeywell will be providing 124 MWh of BESS, including an end-to-end battery management system with an integrated safety system, according to ...

The US Virgin Islands has some of the highest costing energy in all of the United States and it's territories. Advance Power's team has been and remains committed to working with the U.S. Virgin Islands community and related governmental agencies to build an onshore megawatt class wind turbine installation.

The solar-plus-storage system is expected to fulfill 30% of the islands" energy consumption needs. According to the Department of Energy (DOE), the U.S. Virgin Islands have heavily relied on fossil fuels to generate electricity in the past. This means residents accrued expensive electricity costs that fluctuated with global oil prices.

Advance Power, LLC is a Virgin Islands company which was formed in 2014 to design, build and operate a wind turbine installation to produce electric power in the territory. Advance Power has teamed up with and is proud to be working with the turbine manufacturer LEITWIND and other experienced specialists.

Honeywell will provide its first installment of 124 MWh battery energy storage systems (BESS) to VIElectron, a CB Loranger Company, for six 140 MWDC solar parks across the U.S. Virgin Islands. Upon completion, the solar array and BESS will help strengthen the islands" decarbonization efforts by achieving 30% of their energy consumption through ...
