

Ubbink solar Madagascar

Solar United Madagascar is a community-led partnership providing safe, reliable, clean energy to light homes, power education and support livelihoods, introducing energy sources that will not further damage health or fuel climate change.

The Madagascan government is launching invitations to tender for the construction of two solar photovoltaic power plants with a combined capacity of 210 MW. Interested companies have until 9 August 2023 to apply.

Final stage of 42MW solar PV hybridisation project in Madagascar underway following completion of initial installations totalling 5.7MW. Three large-scale heavy fuel oil (HFO) plants in Madagascar are being hybridised with solar PV thanks to a USD 6 million bridge loan from REPP to developer Lidera Green Power (Lidera).

Madagascar is one of the sunniest countries in the world with more than 3,000 hours of sunshine per year, so decentralised solar power supply to rural areas is not only easier but also cheaper. Atmosfair finances the construction and operation of decentralised solar power grids ('solar mini-grids') in the southwest of the island

Madagascar is among Africa's richest countries in terms of renewable energy potential. Many of the island's regions have more than 2800 hours of annual sunshine, which are some of the highest levels on the continent. The north and south of Madagascar have wind speeds that are highly favourable to the production of electricity.

Ubbink, since 1896, offers total HVAC and building solutions that contribute to sustainable improvement of buildings. The products are developed in three solution fields: Energy, Ventilation and Building.
