

What is energy storage Europe?

As part of the World of Energy Storage, Energy Storage Europe is the industry's connecting point that effortlessly brings together both regional and international developments," adds Urban Windelen, Federal Managing Director of the German Energy Storage Association (BVES). B2B orientation is strengthened through trade fair cooperations

Why is energy storage Europe important for North Rhine-Westphalia?

ENERGY STORAGE EUROPE, the leading international trade fair for energy storage, presents the entire range of technologies and applications and provides important approaches to solutions. Especially for the energy state of North Rhine-Westphalia, these innovations are of particular importance."

Who is Uniper energy storage?

As one of Europe's largest gas storage operators, Uniper Energy Storage ensures that energy is available flexibly whenever it is needed. As an independent company, we offer access to 9 underground gas storage facilities in Germany, Austria and the UK with a total capacity of 80 TWh, which are connected to four market areas.

Which natural gas storage facility is the largest in Germany?

This natural gas storage facility has been in operation since 1975 and is one of the largest pore storage facilities in Germany with its 0.8 billion m³ storage volume in 1,500m deep sandstone layers. Uniper Energy Storage owns and operates this storage facility and tends to market its storage capacities on a seasonal basis.

How smart is the EUREF-campus Düsseldorf?

The EUREF-Campus Düsseldorf is smart in terms of energy: a high-tech energy centre and the use of solar power and other renewable energies make the EUREF-Campus Düsseldorf a showcase project even before it goes into operation. It will be part of a network of environmentally friendly energy producers as well as storage facilities in the region.

Who is Uniper energy storage Austria?

Uniper Energy Storage Austria is the Austrian branch of Uniper Energy Storage GmbH, based in the heart of Vienna. It was founded in April 2011 and represents Uniper Energy Storage in the Austrian energy market. It maintains contacts with its local customers, market partners and government agencies.

Uniper Energy Storage will develop salt caverns for the underground storage of hydrogen with a planned working capacity of 250 to 600 GWh by 2030; Investigation of existing and new sites along the hydrogen core network in ...

Main product group Energy Storage, renewable energies, Building Parts, Materials, Services, Research and Development, Professional Literature

The Energy Storage Europe is an international trade fair with accompanying congress on the collection and storage of renewable energy, which is an issue that moves scientists and politicians worldwide.

Als Teilnehmer der Expo for Decarbonised Industries & ENERGY STORAGE (decarbXpo) in Düsseldorf erwarten Sie neue Geschäftspotenziale und hochklassiges Networking rund um drei Megatrends der Energiewende: Dekarbonisierung, Energiespeicher und Wasserstoff.

Uniper Energy Storage will develop salt caverns for the underground storage of hydrogen with a planned working capacity of 250 to 600 GWh by 2030; Investigation of existing and new sites along the hydrogen core network in Lower Saxony and North Rhine-Westphalia; Krummhörn storage site to be expanded in future

Energy Storage Europe is the trade fair for the global energy storage industry with focus on applications and energy systems. The international specialist conferences, taking place in parallel, offer the world's largest conference programme on all energy storage technologies.

At Energy Storage Düsseldorf KBB UT will promote its services in underground energy storage focusing on the storage of renewable energy in a future energy supply chain, for example power-to-gas. The firm is working on numerous pioneering planning and R& D projects for future compressed air and hydrogen scheme, where the main remit is estimating ...

Energy Storage Europe is the trade fair for the global energy storage industry with focus on applications and energy systems. The international specialist conferences, taking place in parallel, offer the world's largest conference ...

Energy Concept. Intelligent architectural approaches, the use of new energy storage systems as well as regenerative energy sources and the consistent networking of state-of-the-art technology will enable the CO2 climate protection targets of the state capital Düsseldorf to be achieved by 2035 right from the start.

Exhibitor directory and list of 271 exhibiting companies participating in 2022 edition of Energy Storage, Düsseldorf to be held in September.

As one of Europe's largest gas storage operators, Uniper Energy Storage ensures that energy is available flexibly whenever it is needed. As an independent company, we offer access to 9 underground gas storage facilities in Germany, Austria and the UK with a total capacity of 80 TWh, which are connected to four market areas.
