Will Biden Cancel \$13 billion subsidized wind & solar?

Sept 24 (Reuters) - The U.S. Department of Energy intends to cancel more than \$13 billion in funds that the Biden administration had pledged to subsidize wind, solar, batteries and electric vehicles, it said on Wednesday. It was not immediately clear which funds were being targeted.

Did Trump cancel the largest solar project in the United States?

A large solar installation is seen in Arrolime, Nevada, on April 1, 2023. The Trump administration's cancellation of the largest solar project in the United States has sparked confusion and concern among Republicans and Democrats alike.

Was Biden's solar duty suspension unlawful?

The US Court of International Trade has ruled that the Biden administration's two-year suspension of solar duty collections was unlawful, clearing the way for retroactive tariffs on billions of dollars of solar gear from Southeast Asia. From pv magazine USA

Why did the US stop importing solar panels from Southeast Asia?

At the time of the investigation, solar panels from Southeast Asia made up 80% of supply in the United States, and exporters stopped bringing in more panels for fear of high retroactive duties. Biden's two-year tariff pause was to ensure a sufficient supply of solar panels to meet domestic electricity generation needs.

How many solar panels did the US import in 2022-2024?

U.S. importers brought in roughly 88.2 GW of solar cells and panels from Cambodia, Malaysia, Thailand and Vietnam during the 2022-2024 period, which could result in upward of \$67.4 billion in retroactive duties.

What does the US Court of international trade decision mean for solar?

The US Court of International Trade decision represents a hard blow to developers and importers who brought in huge amounts of low-priced, largely Chinese-made solar imports from Southeast Asia over the two years between June 6, 2022, and June 6, 2024.
