How many power outages are there in Venezuela?

Several Venezuelan states experience blackouts frequently, and outages occur daily in the western part of the country. Infobae stated in August 2024 that "unofficial estimates" are that Venezuela has about 200 daily power outages, with frequent complaints to Corpoelec, the state-run power company.

Did Maduro sabotage cause Venezuela's power outages?

Nicolas Maduro's government has blamed sabotage for the nationwide power outages. Power has begun to return to some parts of Venezuela after its capital Caracas and much of the rest of the country were plunged into a blackout that the government blamed on sabotage.

Where does Venezuela's power come from?

Another major national blackout occurred on 22 July. Most of Venezuela's power comes from one of the largest hydroelectric dams in the world, Guri Dam in Bolívar State, Venezuela on the Caroni River; as of 2019, 70-80% of Venezuela's power comes from Guri.

What happened to Venezuela's power after a blackout?

Two weeks after power was restored from the 7 March blackout, Venezuela was still enduring ongoing power outages; on 25 March, another widespread blackout occurred. The Guardian reported that half the country was affected, and other media sources said 14 to 16 of Venezuela's 23 states were without power.

How has the power crisis impacted Venezuela?

The ongoing power outages have worsened the crisis in Venezuela and "suffering, cutting off water supplies and leaving hospitals and airports in the dark". On 31 March, Maduro announced a 30-day plan to ration power. Another major national blackout occurred on 22 July.

Why do Venezuelans need electricity?

Urgent humanitarian needs and the demands of Venezuelan citizens call for the restoration of electricity supplies as fast as possible, but also with a modern system that ensures low electricity prices that enable competition and economic growth. P. M. De Oliveira-De Jesus: Conceptualization, Writing and proofreading.
