

Steps forward have been taken for the first pilot deployment of large-scale battery energy storage system (BESS) technology in Vietnam, with Honeywell signed up as equipment provider. The project will be a short-duration BESS of 15MW output and 7.5MWh capacity, to be installed at the site of the 50MWp Khahn Hoa solar PV plant in the south ...

Steps forward have been taken for the first pilot deployment of large-scale battery energy storage system (BESS) technology in Vietnam, with Honeywell signed up as equipment provider. The project will be a short ...

Vietnam's REA and GEAPP hosted a workshop on integrating battery energy storage systems into Vietnam's power grid, where they also launched a report on battery storage co-authored by the Institute of Energy ...

Marubeni Corporation, through its wholly-owned subsidiary Marubeni Green Power Vietnam Co., Ltd, has commenced a battery energy storage system ("the BESS") demonstration project in the Socialist Republic of Vietnam ...

Vietnam needs to consider the development of battery energy storage system (BESS) while the country is on a path towards promoting renewable energies to ensure energy security and sustainable ...

With the rapid growth of renewable energy in recent years, industry experts are urging Vietnam to increase the use of battery energy storage systems (BESS) within its national power grid. Pham Dang An, deputy general director of Vu Phong Energy Group, emphasized that BESS is becoming increasingly vital for ensuring energy security and fostering ...

The eighth National Power Development Plan (PDP8) has taken into account the high integration rate of renewable energy into the power system with a goal that Viet Nam's power system will have 2,700 MW storage of energy by 2030, including 2,400MW of pumped-storage hydropower and 300MW of battery energy storage.

Battery Energy Storage Systems (BESS) play a pivotal role in addressing these challenges by minimising the intermittency of renewables, enhancing grid flexibility, and ensuring reliable power supply. In a significant development, Vietnam Electricity (EVN) has secured approval for its first pilot BESS project with a capacity of 50 MW/50MWh.

The 8th National Power Development Plan (PDP8) has taken into account the high integration rate of renewable energy into the power system with a goal that Vietnam's power system will have 2,700 MW storage of energy by 2030, including 2,400MW of pumped-storage hydropower and 300MW of battery energy
