Does Vistra have a battery storage facility?

Vistra recently completed construction on Phase II of its Moss Landing Energy Storage Facility. The battery system is now storing power and releasing it to California's grid when needed. The 100-megawatt expansion brings the facility's total capacity to 400 megawatts/1,600 megawatt-hours.

Will Vistra expand its Moss Landing energy storage facility?

IRVING, Texas, Jan. 24, 2022 / PRNewswire / -- Vistra (NYSE: VST) today announced that it plans to further expand its Moss Landing Energy Storage Facility in Moss Landing, California.

Does Vistra own wind power?

In addition, Vistra is a large purchaser of wind power. The company owns and operates the 400-MW/1,600-MWh battery energy storage system in Moss Landing, California, the largest of its kind in the world.

Where is Vistra's lithium-ion battery system located?

Utilizing technology from LG Energy Solution, Vistra's enormous lithium-ion battery system is co-located on the site of its existing Moss Landing Power Plant in Monterey County, a site that's been providing electricity to Californians since 1950.

Does PG&E have a battery storage facility at Moss Landing?

Vistra has previously said Moss Landing Energy Storage Facility could eventually host 1.5GW/6GWh of battery storage, if market conditions make that viable. PG&E also has a BESS plant that it owns, the 182.5MW/730MWh Elkhorn Battery project, at the Moss Landing site.

What happened to Vistra's Moss Landing project?

As regular readers of Energy-Storage.news will know, Vistra's Moss Landing project has not had the easiest first few years of operation: between September 2021 and June 2022, both of the first two phases had to be taken offline after separate overheating incidents.
