

# Zeda solar Guernsey

5 &#0183; In 2023 Guernsey Electricity worked in conjunction with The Little Green Energy Company to install the vast community-scale solar array at Grow Limited's newly redeveloped headquarters. The 310 photovoltaic (PV) panels will produce 129-kilowatt peak power (kWp).

Guernsey has already started on-island renewable generation with community-scale solar arrays feeding over 350kW of renewable solar power into the grid. This means that no matter your property size, a portion of your electricity will always come from on-island solar energy.

Solar electricity panels, also known as photovoltaics (PV), capture the sun's energy and convert it into electricity that you can use in your home. You'll need a more or less south-facing, unshaded roof or garden area. You'll then need to think about your current electricity demand and what size of system you might need.

Efficient and environmentally friendly, the use of solar PV or solar panels in Guernsey is on the up. A fantastic investment, they are a great way to reduce your carbon footprint and make your home or property more energy efficient and eco-friendly, whilst also offering a greater financial return than savings in the bank.

Here you can find a list of installers supplying Solar Panels and Solar PV systems in Guernsey and the surrounding area. You can contact them using the "Get a Quote" system and ask them for information or a quotation at your leisure.

Situated in the Bay of St Malo off the west coast of Normandy facing the Atlantic Ocean and with some of the strongest tidal currents in the world, the Bailiwick of Guernsey is well positioned to be a major contributor to the emerging marine renewable energy market and meeting the needs of the 21st century.

We are an independent and owner managed financial services group in the Bailiwick of Guernsey. We specialise in the creation of offshore asset management companies, the establishment of fund structures across offshore jurisdictions, fund administration and corporate services.

It's not just in sunny weather that Solar PV works for you, in all conditions our SunPower panels are designed to work. Contact us today, to discuss how we can help you build your own ...

Every solar panel we install, every watt of clean energy harnessed--it's a step toward a zero carbon world. From our initial consultation to the final installation, every step of our process is guided by:

How low can you go? One panel. 300 watts output, simply plug the microinverter into the mains socket. We supply a "VZPV" (Very Easy PV) package that does just that and includes all the paperwork to Guernsey Electricity. Visit our projects page to see our past installations.
